

PT TRAINS

All the details in your hand

FUNCIONALIDADE

Alimentado pelo pantógrafo, ou reproduzindo os sons reais o modelo é funcional na sua plenitude.

DETALHE

Reproduzida com todos os pequenos detalhes, desde as buzinas às pinturas da Kruella fielmente replicadas.

EXCLUSIVIDADE

Nesta edição limitada a 210 unidades, numerada e assinada pela própria Designer "Kruella de Enfer", a PT Trains proporciona-lhe um exclusivo só seu.

FIABILIDADE

Desde que mantido de acordo com o programa de manutenção, o modelo foi concebido para ser fiável e durável.

REALIDADE

O apanha-vacas e o degrau removido na parte frontal reproduzem a realidade portuguesa.

The Vectron MEDWAY family

A serie Siemens Vectron LE4700 ao Serviço da Medway foi produzida inicialmente fruto de um contrato subscrito em 2006 entre a CP e Siemens. Com entrada ao serviço em 2009 na CP Carga, passaram para a Medway com a aquisição da CP Carga pela MSC. Foram produzidas 25 locomotivas desta série, todas ao serviço da Medway. Dispondo de uma potência nominal de 4684 kW e uma capacidade de tração de 300 kN, permite-lhe rebocar comboios de 1000 toneladas e atingir velocidades de 140 km/h. A sua construção incorporou novas tecnologias, que aumentam a sua eficiência e reduzem os custos operacionais permitindo uma redução de 70% de emissões de CO₂. Esse facto é realçado na Medway 4725 "Susana" através da alteração da pintura, mostrando que o transporte ferroviário é uma das alternativas mais sustentáveis para o nosso planeta.

The H3 Family – Mirroring the original

The 700kW, 3-axle H3 Hybrid locomotives are equipped with a 350 kW diesel generator and a 350 kW battery. The H3 locomotive is 12.80 m long and 3.13 m wide, weighing 67 tonnes, with a maximum axle load of 22.50 tonnes. They are designed for a 40-year service life. They can navigate curves with a minimum radius of 60 m and are equipped with flexicoil suspension. The starting torque is 240 kN (550 kW rated power). The maximum speed is 100 km/h, allowing them to operate on main lines as well. A number of major companies already operate the H3, such as DB AG, SBB, MEG, Metrans, etc.

FUNCTIONALITY

Change from two rail system to three rail system with a click.

REALITY

A cabin with a driver and all inside details reflects the real world

DETAIL

All the details are here, from the detailed stairs to the working steps on the cabin.

ACCURACY - MIRRORING

The original led to an usual bottom on the loco allowing to see through as in the real one.

The CL64 Family

In 1988, the Dutch Railways (Nederlandse Spoorwegen, NS) ordered 120 units, built by the BBC and MaK (Machinenbau Kiel) consortium.

The 6400 and 6500 series locomotives are used for all types of freight and shunting trains.

They operate individually, in multiple units, and in triple heading configurations, hauling domestic freight trains in the Netherlands, and international freight trains to Germany and Belgium. A number of 6400 and 6500 series locomotives operate on regular services in Belgium, hauling lime and container trains.

After the merger of NS Cargo and DB Cargo into Railion GmbH (2000), the locomotives operated for Railion Benelux NV (which later became Railion Nederland BV). In January 2009, Railion was acquired by DB Schenker, and the locomotives began operating for DB Schenker Rail Nederland BV and DB Schenker Belgium.

From 2015 onwards, several private companies acquired 6400 and 6500 series locomotives, including LTE, Railtraxx, DB Poland, and Grenland Rail (Norway).

A few locomotives were in service for a time with the infrastructure company ProRail BV

Technical data

Length: 14.40 meters

Weight: 82 tons

Power: 1180 kW (1,605 PS)

Quantity produced: 120

Maximum speed: 120 km/h

The Sggmrss 90' Family

PT Trains presents the Sggmrss 90' railcar, consisting of two articulated platforms and three bogies, designed for the inter-modal transport of containers in international freight traffic. With capacity for up to four 20-foot containers or combinations of 30, 40, and 45-foot containers and swap bodies, it is suitable for speeds of up to 120 km/h. This model is available in the livery of VTG, AAE, Clip Intermodal, Continental Rail, Ermewa, Eurowagon, and PCC Intermodal. In PT Trains products, you can find exact reproductions with all the technical details.

FUNCTIONALITY

PT Trains always tries to allow our customers to have a full functionality of our products. So, once again you can find the opening doors of our containers and the working pins, that turns your lay out in to a photography of the real world.

REALITY

PT Trains respects the Reality as much as possible, and on this model we did it again. You can choose if you want the reality and work with the model only in R3, or if you choose functionality over reality and leave it as it to work on R2.

DETAIL

It is in the small details that you can see that this is a PT Trains product, all the details on the container doors, all the lettering in the wagons...

RELIABLE

Once again our models bears coper bearings and are all made of steel so they don't derail on your lay out and they can run and run and run and run...

The Lgnss-MC4E 45' family

PT Trains presents the MC4E 45' wagons in Iberian and international versions

The MC4E wagons are a type of container wagon (flat wagon) used in the rail transport of goods, especially in Spain but also in other European countries. With only two axles and capable of transporting 20', 40' and 45' containers at speeds between 100 and 120 km/h, they allow an adequate weight distribution for heavy loads, which makes them efficient, very flexible and with good intermodal integration. They are mainly used on international routes such as Spain-Portugal, Spain-France (via the Pyrenees) and then with connections to central Europe. In this first phase, PT Trains is pleased to reproduce them in the colours of RENFE - VTG - CAPTRAIN - TRANSFESA - CONTINENTAL RAIL.

REALITY

Working Bumpers and container Pins reflect the real models.

FUNCTIONALITY

The metal structure adds weight to the model, providing smooth movement on the tracks, thus avoiding derailments on curves, even with empty wagons.

RELIABILITY

All models have copper bearings for better performance and durability.

DETAIL

For the Fans delight, the entire model was built with attention to the smallest details according to reality.

PT Trains presents the 4-axle wagon **SGMMNSS 40'**

The Sgmmnss 40' is a platform wagon suitable for transportation of ISO containers with length of 20' and 40' produced by Tatravagonka. With a maximum capacity of two TEU's, and capable of achieving 120 km/h is used by several railway operators. In these series, now edited by PT Trains, we present the Touax Rail and Modalis versions, where all the details and variants are faithfully reproduced, namely the number of pins, brake wheels, braking systems, safety systems, etc. From PT Trains to your delight.

PT Trains presents the 60' SGNSS wagon

Is with great pleasure that we present the first wagon manufactured by PT Trains. A piece that we hope you will enjoy given the detail level with which it was made. The first units in real life were manufactured by Tafesa in 2022. Platform wagon with a maximum capacity of three TEU's, capable of 120 km/h is used by several Railways operators (Takargo, Renfe, Comsa, Captrain, VTG España and Continental Rail) to transport containers. There is a version with 28 pins for containerized cargo and 32 pins for transporting wood and/or containers. This latest version is only used by Takargo, Comsa and Captrain.

DETAIL

The smallest detail available to you.

DETAIL

The smallest detail was reproduced in this Dinazzano Po container. The visiting doors are made with the smallest detail. They can be totally opened and they close under pressure avoiding the dust to come out... we are talking about the miniature, but the reality works exactly the same...

RELIABILITY

All containers are made according to PT Trains standards. They fit perfectly in our pin wagons and they are made to be workable and fit exactly in your mind scenery.

REALITY

For those who search for reality on a different world there is a possibility to place the chain that locks everything in place, and prevents any losses.

FUNCTIONALITY

By achieving a new level of functionality in our containers, we allow you to open the doors more than 215 graus.

The 20' OT DP - DINAZZANO PO family

PT Trains presents the 20' OT DP

These special 20' containers, are manufactured by the Italian company SICOM and used for Bulk cargo transport in the Emilia-Romagna region and in the Port of Ravenna By Dinazzano PO. These special containers usually are carried by Touax Rail Sgmmnss 40' Wagons (PT Trains product reference 100200 to 100207).

20'DV and 40'HC containers were PT Trains first projects, and from the start you could see the quality and detail that was put on them. PT Trains purpose was to make something different from what was in the market, and this has been achieved. This was a faithful reproduction of real containers, where all the development was made in house. The level of detail can be seen in their functionality with the opening doors, the number of vents, the types of doors, hinges and inscriptions. Made in ABS - plastic - and metal parts, in a way that people can have exactly what they want, with more than 21 references. A particular detail stands out from the rest: the typical triangular corners of the MSC containers for both 20'DV and 40'HC.
